

Electrical & Data Communication Managed Services

Reliable electrical and connectivity services for mission-critical environments

Alliance SI delivers compliant electrical and connectivity services across complex, mission-critical environments nationwide. We reduce operational risk, protect uptime and ensure systems perform as intended – not only at installation, but across the operational lifecycle.

Through proactive maintenance programs, national capability and specialist electrical, data and wireless expertise, we provide structured, ongoing support that sustains performance over time, moving organisations from reactive call-outs to accountable infrastructure management.

As environments evolve, continuity of oversight becomes critical. Alliance SI remains accountable for performance long after delivery, preserving design intent and maintaining standards alignment across every site.

ELECTRICAL & COMPLIANCE

Safe operations. Standards maintained.

Electrical Audits & Risk Assurance

Lower failure risk and compliance managed and maintained over time.

- › Audits aligned to Australian Standards
- › Thermal imaging and live load testing
- › Asset condition reporting and risk registers

Electrical Safety & Monitoring Program

Safe, compliant environments supported by proactive oversight.

- › Test & Tag (single site to national)
- › Emergency and exit lighting compliance
- › PDU monitoring and ESG-ready reporting

CONNECTIVITY & NETWORK

Clean builds. Reliable performance.

Fibre Cross-Connect & Patch Management

Reliable connectivity built and maintained correctly.

- › Fibre cross-connect managed services
- › Patch management and MACs (copper & fibre)
- › Change control and as-built documentation

Wireless & Network Performance Services

Stable, high-performing networks that scale with demand.

- › Wireless surveys, design and RF tuning
- › Performance optimisation and scalability planning
- › Fully documented network environments

Governance & Assurance

Alliance SI operates an ISO-certified Integrated Management System covering ISO 9001, 14001, 45001 and 27001, supporting consistent service delivery, regulatory compliance and enterprise risk management.

We also engage external cyber security specialists to assess alignment with the ASD Essential Eight, including structured gap analysis and prioritised remediation planning aligned with Australian Government guidance.

Proven Track Record

Trusted by industry leaders for almost 50 years

National and APAC Reach

Comprehensive coverage across Australia and Asia Pacific

Commitment to Quality & Safety

ISO-certified governance and WHS systems

Future Ready Investment

Ongoing investment in people, training and tools

Strong Processes

Consistent, reliable delivery across complex environments.

Ready for structured, accountable infrastructure support?

Alliance SI provides dependable managed services across electrical, data and technology environments, helping you reduce risk, protect uptime and maintain consistent performance nationwide.
